## The new generation *evolves!*

The **Evolution** range provides a truly versatile drinks vending solution for all environments where a high quality beverage needs to be served quickly and efficiently. The machines offer a full range of instant, freshbrew and bean to cup drinks as well as an extensive selection of still and carbonated cold drinks.

With its large ingredient and cup capacity, dynamic looks and user friendly interface the Evolution has been developed to provide delicious, thirst quenching drinks around the clock.

So, select your favourite from the menu, push the button, and enjoy the experience!

### Choice of Selection Method

The Evolution offers a choice of two selection methods, the build-a-drink keypad (left) and a traditional numeric keypad (below), to suit any environment.

The build-a-drink keypad has user friendly backlit buttons making it easy to use. The build-a-drink approach is intuitive with the selections and pricing clearly displayed.

An enlarged LCD display provides clear and concise information.

## Enjoy a delicious freshly brewed tea or coffee beverage!

The single freshbrew Evolution incorporates a paper brewer producing high quality freshbrew drinks from either pre-ground coffee or leaf tea.

The double freshbrew model features a compact, paperless double brewer capable of delivering both freshbrew tea and coffee selections through the same unit. The drinks are produced in separate brew chambers ensuring that there is no cross contamination between vends.

### Motorised Dispense Head

- Provides 3 dispense positions for hot drinks, cold drinks and hot water
- Prevents cross contamination between vends

### Product Branding

- Large graphic areas can be easily customised
- Advertise product promotions or display branded products

### Flexible Cup Drop Unit

- Large 600 cup capacity
- Dispense either paper or plastic cups from 7 oz to 9 oz sizes
- Consistent, error free cup delivery

### SureVend™ Guaranteed Product Delivery

The **SureVend™** product delivery feature guarantees that the selected drink is only

dispensed when sensors detect a cup in the dispense area.

The system works by attempting to drop a cup up to 3 times. After 3 attempted vends the customer is given the option of using their own mug or accepting a refund.

## Bean to Cup or Freshbrew Coffee...

...the choice is yours!

The Evolution bean to cup features the unique CoEx® brewer. This compact solution allows both full flavoured bean to cup selections as well as freshbrew coffee to be produced from a single unit.

Now you can savour the aroma and full flavour of coffee brewed from the bean or enjoy a long smooth freshly brewed filter coffee suitable for all day drinking, from the same machine.

### The Evolution Bean to Cup Advantage:

- Produces low pressure freshbrew coffee and high pressure bean to cup selections from single, compact CoEx® unit
- Versatile CoEx® unit also allows bean to cup coffee selections to be brewed under low pressure
- Consistent drink quality from every vend
- Paper cups for that authentic coffee house experience
- Simple lever operated locking device facilitates removal of CoEx® brewer. Unit can be quickly and easily cleaned in hot water
- Market leading solution
- Optional freshbrew tea brewer

Evolution machines fitted with either the CoEx® or double freshbrew brewer must be fitted with a water hardness reducing filter. Crane Merchandising Systems recommend and supply the Brita AquaQuell compact water filter.

## Why choose Evolution?

- Instant, freshbrew and bean to cup models available
- **SureVend™** guaranteed product delivery system fitted as standard
- Unique CoEx® brewer produces true espresso based selections from beans plus traditional freshbrew coffee
- Numeric or build-a-drink keypad increases versatility
- Flexible cup drop unit capable of vending paper and plastic cups
- Three point door locking for greater security
- Operator friendly! Easy to clean, fill and maintain
- Common components and simple machine programming

### The Perfect Combination

Match the Evolution with snack, food and combination machines from the Crane Merchandising Systems range to create a total vending solution tailored to the needs of specific staff/customer preference or location.

Select your favourite from the Evolution's superb drinks menu!
